More information

Previous scientific research focused on the issue of farm economics - especially apiculture - rural diagnoses and local monographs.

The main research directions focused on the following aspects:

- Diagnostic analyzes of the economic and social activity of representative agricultural holdings for the Iasi county economy;
- Determining the profitability of bee-keeping systems;
- Determination of the effects obtained by introducing pollination of cultivated entomophilous plants;
- Identification of ways to increase the profitability of agricultural holdings;
- Improving the methods of implementing services in the rural economy;
- Socio-economic research oriented towards the mountain area.

Current and future scientific research is based on the following objectives

- Increasing the economic efficiency of the production and services of the economic units within the agri-food sector;
- Increasing the economic efficiency of organic farming;
- Reduction of non-renewable energy consumption in the agrifood sector in conditions of economic efficiency;
- Strengthening the role of agriculture as a supplier of renewable energy;
- Increasing the economic efficiency of the use of non-economic imputations in agriculture;
- Determining the role of public institutions in the agri-food sector development based on the "cost-effectiveness" criterion
- Continue research into the beekeeping economy complemented by previous goals.

Priority activities are: scientific documentation; carrying out field socio-economic research; elaboration of data bases necessary for scientific research, conducting of socio-economic analyzes; development of viable socio-economic models; setting up and advising pilot economic units generated by their own scientific research.
