

# **Pollutants and their impact on the environment and the consumer (III-rd Year of study, VI-th Semester)**

**Credit value (ECTS) 4**

## **Course category**

Specialty (Imposed)

## **Course holder:**

**Lecturer PhD. Camelia Elena LUCHIAN**

## **Discipline objectives (course and practical works)**

The course aims to explain the particularly complex and acute problems of the environmental pollution crisis of recent decades, due to the accelerated development of human society. The issue of the environment has acquired a planetary dimension, the notions regarding the environmental aspects have penetrated in all fields of life and human society, in the economic, social, political, legislative fields, in education, culture.

The practical works aim to familiarize students with methods and techniques for protection and elimination of pollutants from various environmental components: air, water, soil.

## **Contents (syllabus)**

<b>Course (chapters/subchapters)</b>
<b>1. Introduction to the field of environmental protection. The need for study and environmental protection actions.</b>
<b>2. The main environmental risks.</b>
<b>3. Pollution and atmosphere protection</b>
<b>4. Pollution and waters and aquatic systems protection.</b>
<b>5. Pollution and soil protection.</b>
<b>6. Biodiversity conservation.</b>
<b>7. Monitoring and quality control of the environment in anthropized systems.</b>

<b>Practicum</b>
<b>1. Methods of sampling from different environmental components.</b>
<b>2. Procedures for removing gaseous and vapor pollutants from the atmosphere.</b>
<b>3. Procedures for removing particulate pollutants from the air.</b>
<b>4. Specific procedures for municipal wastewater treatment by pollutant retention and settling methods.</b>
<b>5. Biological treatment of municipal wastewater.</b>
<b>6. Water purification techniques from the food industry</b>
<b>7. Final knowledge verification colloquium</b>
