

Materials and additives used in beverages (MASTER - TECHNOLOGY AND QUALITY CONTROL OF BEVERAGES, 2ND YEAR OF STUDY, 3RD SEMESTER)

Credit value (ECTS): 6

Course category: optional

Course holder: Asist. dr. Stefan Tudose-Sandu-Ville

Discipline objectives (course and practical works)

The aim is to make available to the students the latest theoretical and practical knowledge in the field of materials and additives used in the beverage industry.

Theoretical knowledge will be deepened at the laboratory by using practical applications in the field of instrumental analysis of additives and materials used in the beverage industry.

The principles of the most used chemical and instrumental analyzes will be presented.

Contents (syllabus)

Course (chapters/subchapters)
1. Food additives and their purpose Antioxidants Sweeteners Dyes Flavor compounds Other additives Additive safety
Methods of analysis of food additives Analytical methods: selection and quality control New methods for identifying additives Specific additives Dyes Sweeteners Flavour compounds Antioxidants Other additives
Materials used in the beverage industry Bentonite Gelatine PVPP Active charcoal Kieselgur

Labeling of drinks
European legislation
Other legislation
Codex Alimentarius
Practical works
Safety precautions in the lab
Use of bentonite
Use of yeast and enzyme preparations
Use of antifoam materials
Detection of Sorbic Acid (E200-3)
Detection of Benzoic Acid (E210-13)
Sulfite Detection (E220-8)
Detection of Tartaric Acid (E334-7, E354)
Detection of adipic acid (E355-7, E359)
Detection of Propylene Glycol (E405, E477)
Detection of Ammonia Phosphatides (E442)
Detection of Izobutyrate acetate for sucrose (E444)
Detection of saccharin (E954)
Test

Bibliography
