

EEABB

The **Barcelona School of Biosystems and Agri-Food Engineering (EEABB)** is the **Universitat Politècnica de Catalunya's** biosystems and agri-food engineering school. The School is located on the UPC's **Baix Llobregat Campus**, in the town of Castelldefels, which lies on the coast south from Barcelona, near the airport.

This new campus has first-class laboratories and scientific facilities for teaching, research and innovation in agricultural science, food technology, environmental technologies and biotechnology. The UPC also has experimental facilities in the Agròpolis, in the nearby town of Viladecans, comprising 10 hectares of fields and equipment for research in agricultural science and biotechnology.

The School for Biosystems and Agri-food Engineering at the Universitat Politècnica de Catalunya · BarcelonaTech (UPC)

Bachelor's degrees:

Agronomic Science Engineering
Food Engineering
Landscape Architecture
Biosystems Engineering

Master's degree:

Key Enabling Technologies for the Food and
Bioprocessing Industry (KET4Food+Bio)

**Focused on life, food and
the environment since 1912**

INCOMING STUDENTS

Bachelor degrees lectures are basically in Catalan or Spanish languages, but you can check list of courses taught in English in our website.

You can find details about your application and other important details for your exchange in:

<https://esab.upc.edu/en/incoming-students2>

TEACHING MODEL

- Small number of students per class.
- Continuous assessment system.
- Laboratories after lecture hours.

LIFE ON CAMPUS

Aside from academic schedule, the school offers a buddy programme (SALSA'M) for incoming students willing to help and to make you feel at home.

ESAB provides sports clubs (running, volley ball, soccer, row, paddel,...), chorus, student association, *castells*, languages, restaurant and dorms that students can enjoy while they are enrolled.

WHERE ARE WE?

Escola de Ingenieria de Biosistemas y Agroalimentaria (EEABB)

Esteve Terradas, 8 - Edifici D4
