PARTICIPANTS: Researchers, academic and other staff members involved in the HEI's applied RDI activities

MORE INFORMATION:
<http://stafftraining.viko.lt/>

REGISTRATION:
till March 31, 2024

Dear Partner,

We are delighted to invite you to the Staff Training Week:
APPLIED RDI: CONNECT, CREATE, CHANGE

DESCRIPTION:

The thematic focus of this week is on the acceleration of applied research, experimental development and innovation for more effective regional impact.

For the first time, the International Staff Training Week is organized in partnership with the EURASHE Research Community of Practice. Launched in April 2022, the ReCoP gathers staff in HEIs as well as professionals from various stakeholders, from interested to expert level, and intends to be a learning and exchanging space for new synergies and contributing to shaping the next developments in the European research landscape from the PHE perspective.

The International Staff Training Week will provide a platform for learning, sharing best practices, collaborating, and networking, as well as sightseeing and enjoying Lithuanian culture.

If you want to spend a week in an international environment learning and collaborating, join us!
